**GENERAL ANNOUNCEMENT 2018\_01**  
**JEVIC HEAT TREATMENT SYSTEM APPROVED**

Dear Stakeholders,

JEVIC have gained New Zealand Ministry of Primary Industries (MPI) approval for a vehicles and machinery heat treatment facility in Japan.

As the first company in Japan to be approved for an operational system, we recognize the value this brings to our systems, stakeholders and the vehicle pathway as a whole.

Our comprehensive systems are vital in dealing with live pests which present a threat to New Zealand, by keeping the risk offshore.

If you have any questions, please contact your local JEVIC representative.

Regards,  
JEVIC
